## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicants' election of Knee Actuator: Species D (magnetorheological actuator) in the reply filed on June 4, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Claims 26-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected actuator species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 4, 2004.

### ***Response to Amendment***

3. Applicants' addition of claims 31-70 in the reply filed on June 4, 2004 is acknowledged.

### ***Supplemental Election of Species Requirement***

4. This application contains claims directed to the following patentably distinct species, from each of the three groups of species, of the claimed invention:

#### **Method/System**

Species A: Embodied in claims 1-10 and 21-30

Species B: Embodied in claims 11-20

Species C: Embodied in claims 31-45

Species D: Embodied in claims 46-58

Species E: Embodied in claims 59-70

Art Unit: 3738

**Sensory Data**

Species A: Impact force of amputee's prosthetic leg impacting a knee cap/extension stop

Species B: Axial force, moment, or knee angle

**Individual/Amputee's parameter**

Species A: Varying size

Species B: Varying speed

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, from each of the three groups of species, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 3738

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
